SEARCH REQUEST FORM
Scientific and Technical Information Center

Requester's Full Name: Luke S. Wasson Examiner #: 77895 Date: 3 May 05
Art Unit: 2167 Phone Number 30 272-4119 Serial Number: 10 081525
Mail Box and Bldg/Room Location: RND 3A15 Results Format Preferred (circle): PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Scalable Database Management System
Inventors (please provide full names): Michael J. Wissner, James C. Salem, Arden L. Rodgers
Earliest Priority Filing Date: 4/21/02

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent numbers) along with the appropriate serial number.

A network-based database system (could be Internet)
wherein the ~~system~~ ^{system} receives a request from a client
the system identifies a specific database server to service the request
the system commands the identified database server to dynamically load
the database corresponding to the request
the system returns info to the client allowing direct communication
between the client and the identified database server.

1. dynamic loading of the database is the most important feature
2. the product being claimed is Intuit QuickBase

A Quick Study: Intuit 's New QuickBase Service.(Software Review)(Evaluation)

TEXT:

...collaborate on projects and to share some of your company's resources such as its contact lists-- Intuit 's new QuickBase .

QuickBas e is a database management service--tuned for extreme ease of use--that exploits the universal communications backbone of the Internet. Your data resides on Intuit 's servers; you can view or download the report, table, chart, or other info-bit you need...

...house your data only, and pull-down menus and strategically placed Web links offer appropriate task options. QuickBase also provides an array of data manipulation capabilities.

Intuit also relies on the popular folder metaphor. The principal folder has the name "Owned"--that's where...

...focuses on providing data sharing and analysis at the pace of business. Today, that's pretty quick.

QuickBase

PRO: Extensive database templates and import options.

CON: There often are slight pauses when HTML pages redraw.

VALUE: Easy to start up and use.

Intuit

List price: Free for up to 3 databases; \$15 monthly for 4 to 15 databases; \$50 per month for 16 to 50.

ABSTRACT: An unlikely company is making inroads in the database field. Intuit Inc., best known for shrink-wrapped personal and business financial applications, has launched an online database creation and management service called QuickBase . The arrival of QuickBase has significant implications for direct marketers. It competes with such offerings as Primavera Systems Inc.'s Expedition...

Abstract: During the past few years, tax- and accounting-software maker Intuit has been quietly acquiring companies in an effort to expand into new markets and add bigger companies to its customer base. The \$2 billion-a-year company is best known for its popular tax and accounting software for customers and small businesses. But in the past few years, it has engineered a stealth acquisition strategy to expand into new markets and to add bigger companies to its customer base. It acquired QuickBase by buying Turning Mill Software Inc., before the company even released the product. The power of Intuit's reputation is helping it make conquests in new industries and among bigger customers, even as it retains its focus on the customer and small-business markets.

Design of a control system for computer aided SISO and MIMO control of the contact process

ABSTRACT:

The design of control systems for chemical engineering manufacturing processes is of paramount importance, since such parameters as temperature, concentration, pressure and flow often have to be constrained within certain bounds as a means of attaining preset process optimization criteria. In order to achieve the above we often seek the aid of controllers, which may be conventional PID, adaptive, or intelligent in their design, and these would then work as a part of a complete control system. The system designed in this work is a computer-based control system which has been successfully implemented for the control of the feed flow rate, feed pre-heater temperature, reactor inlet temperature, and hot-spot temperature and position in a Contact Process pilot plant through the use of Self-Tuning PID (STPID), Generalized Minimum Variance (GMV), and Generalized Predictive Control (GPC) philosophies. An IBM computer, employed as the Central Processing Unit (CPU), runs a single main module Microsoft **Quickbase** command program for the simultaneous adaptive control of all the process parameters. In the Contact Process, sulfur dioxide is oxidized on Vanadium Pentoxide catalyst to produce sulfur trioxide which is a raw material for sulfuric acid production.

ABSTRACT: The SL 5500 runs a flavor of the open source Linux operating system instead of the Palm OS or Windows CE in most of these gadgets. It does not work with Macintosh even though Apple's new OS X is based on the same UNIX platform as is Linux. Early buyers seem to be raving about features like a high-definition color screen, decent productivity software with Microsoft compatibility and a whopping 64 megabytes of memory to play MP3 music and even MPEG 1 films. \$499.

ABSTRACT: Besides QuickBooks itself, Intuit has developed interfaces
for programmers to immediately begin connecting to two related offerings --
QuickBooks Site Solutions, a tool for helping small businesses create and
manage Web sites, and QuickBase, a new service that lets businesses such
as architects and construction firms share documents.
